Presents

ColloGel

Plain Collagen Gel

Introduction

Collogel is a purely water soluble, non oily, clear, odourless gel. It is composed of highly purified Type-1 collagen.

Storage

Store at ambient room temperature not exceeding 40 °C.

Availability

30 grams

Mechanism Of Action

- ✓ Collagen is known for its wound healing properties by aiding cellular activity and providing an organised matrix in the skin.
- ✓ Provides moisture to the wound bed, preventing dehydration of granulation tissue.
- ✓ Decreases wound surface contamination.
- ✓ Being transparent gel it facilitates direct monitoring of the wound.

Indications

ColloGel is used for management of wounds including :

- Bed Sore.
- Dermal Lesions.
- First Degree Burns.
- Donor Sites.
- Stretch Management.
- Scar Management.

Directions For Use

- ✓ Thoroughly cleanse the wound with sterile saline.
- ✓ Apply the Gel as required to cover the entire wound.
- ✓ Cover it with appropriate secondary dressing if necessary.

Precautions

- ✓ Avoid patients hyper sensitive to Collagen.
- ✓ Do Not Freeze the Tube.
- ✓ For External Use only.
- ✓ Not For Surgical Implants.
