- Directly print captured pictures through a computer printer and a color video printer.
- Save captured images into a USB flash drive to move wherever you want.
- Examine easy with a user friendly ergonomical design.

AIO All in One

REBONSON

AIO Main Features

The first HD camera System with a Practice Management Software without or with a PC!

AIO Soft I

Practice Management Software in the Camera System without a computer nor complicated software installation, you have a library of patients and save almost 80,000 pictures in the camera system. It enables you to make a report with comments and print one out through a color video printer and computer printer

Register: fill out the information of patients : required info -name, birthday and gender additional info -phone, email , doctor in charge

Search: look for patients' information and images in the database

Capture: freeze and unfreeze images

Editing: draw and mark on pictures to show the areas of concern to patients and colleagues

Inform: retrieve patients 'registration information and their images

Mode: display 1 (full), 2, or 4 images on the screen at once

Config.: put information about hospitals, doctors and patient; adjust colors on a monitor's screen; put IP address to create a network and have real time video conferences; set up language, time and date format; choose pen size for image editing; save images on a USB flash drive
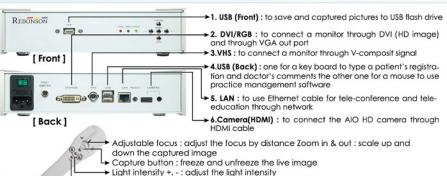

AIO Soft II

Practice Management Software with PC enables you to use the software with a PC for tele-conference and tele-education through ethnet(LAN) cables.
