Each set is housed in rack.

- * Assorted clamping elements essentially required for use on machine tool having T-slotted bed are compactly housed in compartmentalised elegant Rack. Ideal for use on CNC machining centre, milling, drilling, boring, plano-milling, shaping machines.
- * Machine tool manufacturers can supply such set to their customer alongwith each machine to take care of basic clamping requirements.
- * Selection : user to select the type of kit required by identifying T-slot of the machine bed. Protection from rusting, chemically blackened / zinc plate.
