अनार की व्यवसायिक स्तर पर खेती

## Introduction:

**T**C Pomegranate Plants is native to the Middle East and South Asia. The Pomegranate Plant is one of the first live cultivated foods in the world. The Pomegranate Plant produces Pomegranate that is high in potassium, vitamin C and antioxidants. Pomegranate is a high value crop.

## Usage:

**P**omegranate contains higher levels of antioxidants than most other fruit juices. It also has three times more antioxidants than red wine and green tea. The antioxidants in pomegranate juice can help remove free radicals, protect cells from damage, and reduce inflammation.

## Cultivation:

**P**omegranate (*Panic granatum*) is grown in tropical and subtropical regions of the world. The total area under cultivation of pomegranate in India is 107.00 thousand ha and production is around 743.00 thousand tons. Pomegranate is an important fruit crop grown in the dry regions of India. It is also cultivated to a large extent in the northern dry districts & states. This variety has good export potential. Major breakthroughs in the cultivation of pomegranate such as resting period and pruning of plants and the use of plant hormones to obtain better fruit size have contributed in increasing the production of quality pomegranate fruits to meet the preference of consumers in the domestic and international markets.

## Species:

**S**indu variety of Pomegranate is a highly productive variety with large fruit size of distinct deep Saffron colour. Its arils are of deep red colour and enjoy very high market demand. This variety is very suitable for Exports as well.

Because the seed of a pomegranate is the edible part. Seedless fruits are not technically seedless they just have under developed seeds. The pomegranates grown today have the largest seeds possible with the smallest "yolk" possible.

### Marketing:

**P**omegranate, demand is immense in India therefore selling is not difficult. Pomegranate is bought by many people in market. Our company also provides the facility of Buy Back agreement.

### Harvesting:

**W**ithin Second year of cultivation, Pomegranate can be harvested.

### Pomogranate Tissue Culture Plant:

**P**lant tissue culture is a collection of techniques used to maintain or grow plant cells, tissues or organs under sterile conditions on a nutrient culture medium of known composition. Plant tissue culture is widely used to produce clones of a plant in a method known as micro propagation.

## Economics Of One Acre Pomegranate Cultivation:

### Expenditure:

Distance (in acre)	Sapling (in land)	Cost of per plant	Total	Other expenses (as per requirement)	Cost of cultivation
5X8	1100	60 rs	1100X60 =66000	Fertilizers Land preparation Labor expenses etc.	66000
