थाई अमरुद की व्यवसायिक स्तर पर खेती

## Introduction:

**T**he Seedless guava grows on an evergreen tree that can range from 3 to 10 meters tall. It has a shrub-like growth habit with smooth bark that is brownish-green or even red. Ornate feathery blossoms of white and pink dot the foliage and later give way to small green fruits. Seedless guavas are quite misshapen and range from round, ovoid or pyriform and have a thin lime-green skin that is fully edible when ripe.

## Usage:

**F**ood that contain high levels of vitamin C (ascorbic acid) frequently pop up on lists of the best foods for wrinkle-free skin. The anti-wrinkle and anti-aging effects of vitamin C rich foods, such as the guava fruit, have been linked to the ability of vitamin C to stimulate the production collagen and elastic, structural proteins that help keep your skin firm and elastic. In addition, pink-fleshed guavas are also an excellent natural.

## Cultivation:

**T**he fruit vary in size depending upon the fruit load on a tree. The fruit shape usually round some time with short neck pyriform (Pear shaped strain) smooth surface. There are pink dots scattered over the whole fruit, (Chittidar). Pulp is soft and melting, white, taste sweet.

## Species:

**G**uava which is usually propagated from seed can also be propagated vegetative. The plants can be raised through cuttings, layering or mound layering.

## Marketing:

**G**uava demand is immense in India therefore selling is not difficult. Guava is bought by many people in market. Our company also provides the facility of Buy Back agreement

## Harvesting:

**G**uava fruit is climacteric in nature. It can be picked when mature, light green in colour and firm. It ripens during transport on reaching the market and gives excellent colour and taste. The contractors usually harvest the fruit when ripe or nearly ripe for direct sale to the consumers. Few leaves or small branches if kept with the fruits make the fruit attractive and trees get light pruning. For distant marketing this practice should be discouraged.

## Economics Of One Acre Thai Guava Cultivation:

### Expenditure:

Distance (in acre)	Sapling (in land)	Cost (per plant)	Total	Other expenses (as per requirement)	Cost of cultivation
10X10 ft	440	120 rs.	440X120 = 52,800/-	Fertilizers Land preparation Labor expenses etc.	52,800 /-
