गोखरू की व्यवसायिक स्तर पर खेती

Introduction:

Gokshura is an herb and also it is a medicinal plant. It is used in preparation of medicines. It is one of the pure herb which is used in Ayurvedic medicines. The Gokshura is originated from the genus of Tribulus. Gokshura belong to Zygophyllaceae family. The Gokshura is scientifically named as Tribulus terrestris. These herbs are not only used in Ayurvedic medicines, but also in other Indian Medicines like Siddha, Unani and Kashmiri. In North America it is an invasive species. It is an herbaceous tap-rooted perennial plant. These are mainly found in Southern Europe, Australia, Africa, India, China, Vietnam and Southern Asia.

As this is mostly found in the subtropical parts so in India also these Gokshura is found in Punjab, Gujarat, Assam, Jammu and Kashmir, Himachal Pradesh, Rajasthan and Uttaranchal. This Gokshura herb is also named as Gokharu, Gokhru, Gokhru, Bahukantaka and Chirupalleru.

Soil And Climate:

For Growing Gokshura we can use all kinds of soils, as it can thrive well in all types of soils, right from the clay loam –light sandy loam soils. The high level alkaline soils are not more preferred and also not suitable for Growing Gokshura. The water logging should be avoided in the field.

The climate which is required for growing Gokshura is tropical, sub-tropical and semiarid climates. They mostly prefer open sun with warm climate. The rainfall requirement for this crop is also very less.

Properties:

- ✓ This is sweet in taste.
- ✓ It is very heavy to digest.
- ✓ The texture of this Gokshura will be oily
- ✓ After the digestion the taste gets converse.
- ✓ It is a coolant.

- ✓ This can balance three Doshas like Kapha, vata and pitta.

Harvesting:

It is one of the long duration crops. After planting, the plant as it takes 240 -250 days in the main field. The seeds get ripen in October when the crop is uprooted. The harvesting can be done by using the Kudali ripen seeds and also the roots. For the preparation of medicines we need to take the fully ripen seeds and also roots. After the harvesting the seeds and roots, we need to separate the roots and seeds.

The roots and seeds should be dried them in a shade. After they are dried, they should be stored in a shade and the packed material should be kept in a cool – air godown.

Economics Of One Acre Gokshura Cultivation:

Expenditure:

Distance (in acre)	Kit (in land)	Cost of kit (per kit)	Total	Fertilizer	Cost of cultivation
6inchX2 ft	2 kit	2000 Rs	2000X2= 4,000 /-	2,000 /-	4,000+2,000 = 6,000/-
