

Build Well

Water Conditioner

Eco-Friendly Magnetic Water Treatment for Scale Free and Strong Construction.

Micro Greentek
SOLUTIONS PVT.LTD.

No Salt & Chemical

MICRO SALT FREE Technology naturally and safely reduces scale buildup on construction area, as it does not use harsh salt or chemicals for water treatment.

Micro Greentek Magnetic and Catalytic Technology naturally alter the structure of hard mineral ions into a crystal structure that prevents the minerals from binding and forming scale buildup. MICRO SALT FREE Technology is proven for construction with hard water up to 4000 TDS. BUILD WELL Water Conditioner will not demineralize the water, but will not put excessive amounts of sodium into waste water as at present by the available salt-based water treatment solutions.

HOW IT WORKS ?

Our Magnetic technology treats water by transforming dissolved hard minerals into harmless, inactive microscopic crystal particles which prevents Scale Build in Concrete, corrosion of steel reinforcement and enhances concrete strength.

The system is to be installed on the main bore water line coming to your site. It starts crystallizing the hard water minerals immediately as well as cleaning existing scale buildup in your existing pipes and plumbing. Unlike salt-based water softener system that give you that slippery soft water, the salt free water softener system keeps the hard minerals in the water without the white scale buildup. You also don't need a drain or electricity for this system. Our Conditioner does not require drainage for waste water, or complicated salt replacement.

Benefits of Salt-Free Technology

- Easy to install, maintain and it is transportable to different sites.
- Reduces scale buildup and extends life of construction.
- Our Special inhibitor is injected into flowing water in Micro Dozer.
- Single charge of inhibitant powder treats 20 Lakh Liter water.
- The Magnetizer & Catalyzer are effective for more than 30 years.
- Maintenance Free.
- No bulky chemicals or salt bags.
- Enhances concrete strength and gives Scale free plaster.
- Water up to 4000 TDS can be used for strong & good quality construction.

Build Well

Magnetic & Catalytic Water Conditioner and Micro Dosing Technology is the perfect solution for use of all types of Hard Water for Construction

Call: +91 76000 99000

Our Projects

Shreemay Infra
New VIP Road

Approx. 6000 TDS Input Water

Sai Sahaj
Atladara.

Approx. 3500 TDS Input Water

Radhe Villa
Aamodar

Approx. 5600 TDS Input Water

WIZZO
Manjalpur

Approx. 800 TDS Input Water

We also provide services for following...

HARD WATER PROBLEMS

CUSTOMIZED SOLUTIONS AIDED BY GREEN TECHNOLOGY

BUNGLOW
CONSTRUCTION
CATTLE FARM

APARTMENT
AGRICULTURE
PAULTRY

SOCIETY
HOSPITAL
GARDEN

INDUSTRY
HOTELS
& MANY MORE
