AN ISO 9001-2008 CERTIFIED COMPNY

24.cyclone Dust collectors

CONSTRUCTION

- The cyclone dust collector is designed specially for high dust load ,high temperature, and product recovery applications.
- The primary component of the product are a fan, cyclone with a shutter, frame and bag filter, the support structure has wheel equipped with brakes for moving the cyclone dust collector.
- Cyclons dustcollectors is an air pollution control equipment used to remove large dust particals from indusrial process exhausts. Cyclone separator is also same and uses centrifugal forces to collect useful particals in product recovery. Both are one and same, only application differs.

***** TECHNICAL SPECIFICATION

- Material of construction :- mild steel/SS 316 / SS 304.
- > Finish: powder coated /matt finish
- Power option : 3 phase
- POWER: from 2 HP up to 40 HP
 - FILTRATION: up to 5 micron
 - Filter material: polyester filter bag to canister customization

*** FEATURES**

- Low initial costs
- Low maintenance costs
- Less wearable parts
- Can work at high temperature application

* APPLICATION

- Sand blasting ,grit & short blasting
- Bag tube packers
- Belt conveyors
- Shake out conveyors
- Bins & bucket elevators
- Floor gate, grinders
- Mixers , foundry
- Food processing industry
- > Paper & pulp industry
