

## 23.pocket filter

### ❖ CONSTRUCTION

- Pocket filter are made up of non-woven synthetic fiber media to ensure retention of solid particles up to the stipulated micron rating.
- this are covered with supporting Layer of spun bonded media to avoid any type of particles of fiber migration, even after high pressure build up. media are sealed with thermal bonding or stitching as per requirement.

### ❖ TECHNICAL SPECIFICATION

- **Size:-** 1.590 x 590 x 590 mm  
2.610 x 610 x 760 mm  
3.As per require of customer.
- **Filtration rating :-** 1,5,10&25 micron & more
- **Filtration efficiency :**80-90 %
- **Frame material :-**ss 304 / GI (galvanized steel) / aluminum powder coated /CRC powder coated or zinc coated

#### ▪ Media configuration available :

- **Filter media :-** high loft media & synthetic

### ❖ FEATURES

- Pocket filters offer high air value
- Low pressure drop
- High dirt holding capacity
- Good mechanical strength
- Made of selective fibrous material
- Easy to install
- Retrofit to any standard make
- Easy to install

### ❖ APPLICATION

- Pharmaceuticals, Chemicals, Cements, Sugars, Fertilizer, Steel and Power , Powder Coating, Shoats blasting , Metal and Minerals, Paints, Pneumatic conveyer, etc....
