

OptiVision®

Expanding Digital Technologies

DC HYBRID AMPLIFIER

7V-40VDC

MODEL NO. 902

Description :-

Optivision Model no.902 is DC CATV Hybrid Amplifier used in cable transmission system for distribution line and it can offer high quality video transmission service. The equipment adopts (SMT)surface mounting technology with elegant appearance and reliable performance. The main component of bi-directional amplifier high GaAs amplifier module. It is with Metal housing powder coated providing Economically and specially designed to serve CATV network.This unit operated only with DC power supply and can operate 7VDC to 40VDC with very less power unit consumption.

Bandwidth Flatness $\pm 1dB$	ECO FRIENDLY	Attenuation $-20dB$	Hybrid Amplifier
Linear 1000MHz	DC SUPPLY IN : 7V-40V	GaAs IC Module	HD + Digital Ready
