35V DC HYBRID AMPLIFIER

MODEL NO. 935

Description :-

Optivision Model no.935 is DC CATV Hybrid Amplifier used in cable transmission system for distribution line and it can offer high quality video transmission service. The equipment adopts (SMT)surface mounting technology with elegant appearance and reliable performance. The main component of bi-directional amplifier high GaAs amplifier module. It is with Metal housing powder coated providing Economically and specially designed to serve CATV network.This unit operated only with DC power supply and can operate 28VDC to 35VDC with very less power unit consumption.

 Bandwidth Flatness ± 1 dB	 ECO FRIENDLY	 Attenuation -20dB	 Hybrid Amplifier
 Linear 1000MHz	 DC SUPPLY INPUT : 35VDC	 GaAs IC Module	 HD + Digital Ready
