'SSS' Computerized Brinell Hardness Tester, Model SSS-B 3000-PC is a simple and accurate means to produce automatically measures the ball indentation to give Brinell hardness number.

These testers are suitable for measuring the hardness of metallic parts with wide leasting range - from soft to hard, and their accurate results are widely acclaimed.

These testers strictly confirm to IS:2281, BS:10003-2 and ASTM E-10.

Construction :

The robust machine frame is designed to accommodate the high precision loading system and an optical device with CCD camera. Specimen is placed on a testing table and brought in contact with clamping cone. Load/Unload/Read operations are done through a 3-position hand lever. The image is digitized using a CCD camera fitted on the optical device and is captured by the PC. The diameters of the indentation are directly measured by Pc to give the Brinell Hardness Number directly.
