CANCER MANAGEMENT - ONCOLOGIST

NON-INVASIVE DIAGNOSIS AND TREATMENT FOR CANCER

A disease in which abnormal cells divide uncontrollably and destroy body tissue. Cancer is the uncontrolled growth of abnormal cells anywhere in a body. These abnormal cells are termed cancer cells, malignant cells, or tumor cells. These cells can infiltrate normal body tissues. Many cancers and the abnormal cells that compose the cancer tissue are further identified by the name of the tissue that the abnormal cells originated from (for example, breast cancer, lung cancer, colon cancer).

Anything that may cause a normal body cell to develop abnormally potentially can cause cancer; general categories of cancer-related or causative agents are as follows: chemical or toxic compound exposures, ionizing radiation, some pathogens, and human genetics.

More than 200 types of CANCER have been identified, some common among them are:

1. **Basal Cell Cancer** - A type of skin cancer that begins in the basal cells.
2. **Bladder Cancer (Bladder Carcinoma)** - Cancer that begins in the bladder.
3. **Breast Cancer** - A cancer that forms in the cells of the breasts.
4. **Colorectal Cancer (Colon & Rectal Cancer)** - A cancer of the colon or rectum, located at the digestive tract's lower end.
5. **Endometrial (uterine) Cancer** - A type of cancer that begins in the lining of the womb (uterus).
6. **Kidney Cancer** - Cancer that begins in the kidneys.
7. **Leukemia** - A cancer of blood-forming tissues, hindering the body's ability to fight infection.
8. **Lung Cancer** - A cancer that begins in the lungs and most often occurs in people who smoke.
9. **Lymphoma** - A cancer of the lymphatic system.
10. **Melanoma** - The most serious type of skin cancer.
11. **Non-Hodgkin lymphoma** - Cancer that starts in the lymphatic system.
12. **Non-melanoma Skin Cancer** -
13. **Pancreatic Cancer** - Cancer that begins in the organ lying behind the lower part of the stomach (pancreas).
14. **Prostate Cancer** - A cancer in a man's prostate, a small walnut-sized gland that produces seminal fluid.
15. **Sarcomas** - Sarcoma is a tumor that affects connective tissue. Soft tissue sarcomas, as the name suggests, affect the soft tissues; these include fat, muscle, blood vessels, deep skin tissues, cartilage, tendons, and ligaments. Sarcomas are a relatively rare type of cancer.
16. **Thyroid Cancer** - A cancer of the thyroid, the butterfly-shaped gland at the base of the neck.

Top 5 Cancers that affect Indian population are BREAST, CERVICAL, LUNG, ORAL, and COLORECTAL CANCERS.

The incidence of cancer and cancer types are influenced by many factors such as age, gender, race, local environmental factors, diet, and genetics. Consequently, the incidence of cancer and cancer types vary depending on these variable factors.

Different types of cancer

There are over 200 types of cancer. However, the NCI lists several general categories.

Carcinoma: Cancer that begins in the skin or in tissues that line or cover internal organs - "skin, lung, colon, pancreatic, ovarian cancers," epithelial, squamous and basal cell carcinomas, melanomas, papilloma, and adenomas.

Sarcoma: Cancer that begins in bone, cartilage, fat, muscle, blood vessels, or other connective or supportive tissue - "bone, soft tissue cancers," osteosarcoma, synovial sarcoma, lip sarcoma, angio sarcoma, rhabdosarcoma, and fibro sarcoma.

Leukemia: Cancer that starts in blood-forming tissue such as the bone marrow and causes large numbers of abnormal blood cells to be produced and enter the blood - "leukemia," lymphoblastic leukemia (ALL and CLL), myelogenous leukemia (AML and CML), T-cell leukemia, and hairy-cell leukemia.

Lymphoma and Myeloma: Cancers that begin in the cells of the immune system - "lymphoma," T-cell lymphomas, B-cell lymphomas, Hodgkin lymphomas, non-Hodgkin lymphoma, and lymphoproliferative lymphomas.

Central Nervous System Cancers: Cancers that begin in the tissues of the brain and spinal cord - "brain and spinal cord tumors," gliomas, meningioma's, pituitary adenomas, vestibular schwannomas, primary CNS lymphomas, and primitive neuroectodermal tumors.

Cancer Symptoms and Signs

Cancer symptoms and signs depend on the specific type and grade of cancer; although general signs and symptoms are not very specific the following can be found in patients with different cancers: fatigue, weight loss, pain, skin changes, change in bowel or bladder function, unusual bleeding, persistent cough or voice change, fever, lumps, or tissue masses.

Symptoms and signs of cancer depend on the type of cancer, where it is located, and / or where the cancer cells have spread. For example, breast cancer may present as a lump in the breast or as nipple discharge while metastatic breast cancer may present with symptoms of pain (if spread to bones), extreme fatigue (lungs), or seizures (brain). A few patients show no signs or symptoms until the cancer is far advanced.

The American Cancer Society describes seven warning signs / symptoms

- **Change in bowel or bladder habits**
- **A sore throat that does not heal**
- **Unusual bleeding or discharge (for example, nipple secretions or a "sore" that will not heal that oozes material)**
- **Thickening or lump in the breast, testicles, or elsewhere**
- **Indigestion (usually chronic) or difficulty swallowing**
- **Obvious change in the size, color, shape, or thickness of a wart or mole**
- **Nagging cough or hoarseness**

WHAT CAUSES CANCER?

Cancer is caused by certain changes to genes, the basic physical units of inheritance. Genes are arranged in long strands of tightly packed DNA called chromosomes. Cancer is a genetic disease—that is, it is caused by changes to genes that control the way our cells function, especially how they grow and divide.

Other signs or symptoms may also alert you or your doctor to the possibility of your having some form of cancer.

These include the following:

- Unexplained loss of weight or loss of appetite.
- A new type of pain in the bones or other parts of the body that may be steadily worsening, or come and go, but is unlike previous pains one has had before.
- Persistent fatigue, nausea, or vomiting.
- Unexplained low-grade fevers with may be either persistent or come and go.
- Recurring infections which will not clear with usual treatment.

We very well know, at initial stages there are no symptoms. It can be diagnosed only when revealed on the physical. But by then it is too late.

WHAT WE DO & WHAT WE DO NOT DO:

1. WE DO NOT DIAGNOSE:

We assess, measure, determine or evaluate a condition.

2. WE DO NOT PRESCRIBE:

We recommend, suggest, advice or offer options to alleviate the condition.

3. WE DO NOT TREAT:

We work with, release, normalize, relieve, balance or remedy a condition.

4. WE DO NOT CURE:

We alleviate, balance, improve, correct or normalize a condition.

5. WE DO NOT Use the word "DISEASE":

We use condition, problem or imbalance.

6. WE DO NOT MAKE CLAIMS OR PROMISES:

We explain that health is an individual matter with many approaches to healing and no guarantees. It is our job to educate our clients so that they are more in control of their own health.

1996 – GOLD MEDAL

Our work involves to DE-STRESS all concerned areas, causing an imbalance, leading to Diseases / Disorders. We work to MANAGE STRESS, to help the system function normally.

Our work pattern is to DETOXYFY the system. Support it with ESSENTIAL SUPPLEMENTS & FREQUENCY ENERGIES. And finally, provide CORRECTIVE FREQUENCIES, to restore balance in the system. We strongly believe in "BODY HEALS ITSELF".

We, at MEHAK WELLNESS CENTRE, under the expertise of DR. RAJEEV MEHRA, a GOLD MEDALIST & REIKI GRAND MASTER offer NON-INVASIVE Diagnosis on State of the Art, latest 21st Century technology to verify the onset or presence of CANCER & Cancer affected areas.

We, run a complete 7000 parameter test which includes AUTO IMMUNE disorders and CHROMOSOMES and issues related to GENETIC disturbances, thus are in a position to guide the client of a future onset or presence of CANCER and its spread in the system.

With vast experience of over 35 years, working with Cancer patients and being awarded with 80+ Certificates & Awards – DR. MEHRA is confident of handling all types of CANCER. Type of Cancer, and location in the body is not important here.

The test thus helps us in taking preventive measures for the disease much before it can show up on the regular physical tests.

We conduct a test to reveal the Genetic component involved in this disease. On having the results for the Genes, Chromosomes, Auto Immune & Cancer specific areas, we are in a position to assess the damage done or possible damage in the near future.

Of 46 Chromosomes, 6 CHROMOSOMES are responsible for onset of CANCER. Thus these need to be worked upon. Unless all these 6 chromosomes that affect the onset of CANCER are not rectified, permanent resolution to CANCER would not be seen.

Our work is NON-INVASIVE. We work with BIOFEEDBACK and RADIONICS.
Cancerous cells may be of any type or in any part of the system, makes no difference, the therapy remains the same.

Being in NON-INVASIVE stream, we do not recommend Chemo-Therapy, Radiation, or Surgery. As far as possible we advise to avoid removal of any Body Part.

Basic cause of CANCER is mainly linked to GENETIC factors, thus by working on the root cause and stabilizing the GENES, CHROMOSOMES, AUTO-IMMUNE disorders and all parameters related with CANCER, we are in a position to eradicate the CANCER cells without any side effects or danger to client's life. Information on the spread of cancer cells in the system is important to tackle it from each and every cell / organ which it has invaded.

Main causes of activating CANCER are lack of Oxygen supply, Hypoxia and Acidosis. These issues are taken into account for correction along with other related issues instigating / provoking / supporting CANCEROUS Cells.

Our work mainly involves 4 stages- DETOXIFICATION; CHROMOSOME test, to identify hereditary issues, faulty programming; IMMUNITY test, to verify an AUTOIMMUNE angle and finally support with SUPPLEMENTS (AMINO ACIDS, HORMONES, MINERALS and VITAMINS).

REVERSAL OF ALL CONDITIONS, DISEASES, DISORDERS POSSIBLE.

We advise to COMPLEMENT our services, with the ongoing therapies / treatment for better and faster results.

We strongly recommend DETOX procedure, along with IMMUNITY and DIETARY SUPPLEMENTS. This should be started immediately. COLLOIDAL SILVER WATER, ANTIOXIDANT HYDROGEN RICH WATER, ATOMY HEMOHIM and VITAMIN C and use of ZAPPER. Not to forget WHEATGRASS JUICE. RADIONICS and RIFE FREQUENCIES for basic corrections. Start immediately on the RADIONICS maintenance kit. HERBAL NUTRITION STEMCELL booster for speedy recovery. NON-INVASIVE therapy is administered, which could take 18 to 72 sittings of BIOFEEDBACK therapy to resolve most issues depending on the individual's resistance from within and the body's ability to HEAL.
