## HEMATOLOGY MANAGEMENT

### WELLNESS CENTRE FOR HEMATOLOGY - ONCOLOGY NON-INVASIVE

HEMATOLOGY is a branch of medicine involving study and treatment of the blood.

Hematology tests **can be used to indicate, diagnose, and evaluate many conditions, including infection, inflammation, and anaemia. A complete blood count (CBC) measures several components of the blood, including: White blood cells (WBC) - the body's primary defence system.**

**These include blood and bone marrow cells. Hematological tests can help diagnose anaemia, infection, haemophilia, blood clotting disorders, and leukaemia.**

**One of the most common haematology tests is the complete blood count, or CBC. This test is often conducted during a routine exam and can detect anaemia, clotting problems, blood cancers, immune system disorders and infections.**

The three main types of blood cancer are Leukaemia, Lymphoma and Myeloma. **Leukaemia is a blood cancer that originates in the blood and bone marrow. Non-Hodgkin lymphoma is a blood cancer that develops in the lymphatic system from cells called lymphocytes, a type of white blood cell that helps the body fight infections.**

Symptoms of blood disorders:

**Most commonly, symptoms are caused by decreases in the blood components. Decreased red blood cells and haemoglobin can cause symptoms of anaemia, such as fatigue, weakness, and shortness of breath. Decreased white blood cells or immune system proteins can cause recurrent fever and infections.**

**Patients with CANCER, diagnosed or undiagnosed, are at risk for developing Blood Clots, which occur in 4% to 20% of patients. It is the second leading cause of death for these patients. It is important for patients, those with CANCER and those only affected by blood clots, to understand the connection between the two.**

**Examples of blood tests used to diagnose CANCER include Complete blood count (CBC). This common blood test measures the amount of various types of blood cells in a sample of blood. Blood Cancers may be detected using this test if too many or too few of a type of blood cell or abnormal cells are found.**

**Often the conditions that cause Erythrocytosis cannot be cured. Without treatment, Erythrocytosis can increase your risk for Blood clots, Heart attack, and Stroke. It can also increase your risk for Leukaemia and other types of Blood Cancers.**

**It is a BLOOD CANCER that begins in the marrow of your bones, the soft centre where new blood cells grow. If you have Polycythaemia vera, your marrow makes too many red blood cells, which causes your blood to get too thick. That can make you more likely to have Clots, a Stroke, or a Heart attack.**

**Blood Can Be Too Thin or Too Thick. Blood clots cause problems in the affected organ by cutting off oxygen flow. Thick blood is caused by heavy proteins, or by too much blood in the circulation. Too many red cells, white cells, and platelets will result in blood thickening.**

Is High Haemoglobin a sign of Cancer?

Polycythemia is a disease state in which the hematocrit is elevated.

**Polycythemia vera is a type of cancer that causes an increase in the number of red blood cells, and following symptoms are noticed; Feeling full sooner than normal, Skin discolouration, and Fatigue. Polycythemia vera is a Cancer of the Blood in which your bone marrow overproduces red blood cells. With polycythemia, a blood test also shows that you have a high red blood cell count and high hematocrit. Common symptoms of high Hgb levels include itchiness.**

**High Haemoglobin levels could be indicative of the rare blood disease, Polycythemia. It causes the body to make too many red blood cells, causing the blood to be thicker than usual. This can lead to clots, heart attacks, and strokes. It is a SERIOUS lifelong condition that can be fatal if it is not treated.**

**More than 200 types of cancer have been identified. The following are the commonly diagnosed cancer types in 2009, also known as Deadliest Cancers.**

- **Non-melanoma skin cancer / Melanoma**
- **Lung and bronchial cancer**
- **Breast cancer**
- **Pancreatic cancer**
- **Prostate cancer**
- **Colorectal cancer (Colon and rectal cancer)**
- **Bladder cancer**
- **Liver and intrahepatic bile duct cancer**
- **Non-Hodgkin lymphoma**
- **Kidney cancer**
- **Leukemia**

Most common blood clotting disorders

**Though HEMOPHILIA is rare, it can have life threatening complications. Factor II, V, VII, X, or XII deficiencies are Bleeding Disorders related to Blood Clotting Problems or abnormal Bleeding Problems. Von Willebrand's disease is the most common inherited bleeding disorder.**

**Hematology-Oncology in this we shall cover the diagnosis, treatment and prevention of Blood Diseases (Hematology) and Cancer (Oncology) and research into them. This includes such diseases as Iron deficiency Anemia, Hemophilia, Sickle cell disease, Thalassemia, Leukemia and Lymphomas, as well as Cancers of other organs.**

**Our work involves to DE-STRESS all concerned areas, causing an imbalance, leading to Diseases / Disorders. We work to MANAGE STRESS, to help the system function normally. Our work pattern is to DETOXYFY the system. Support it with ESSENTIAL SUPPLEMENTS & FREQUENCY ENERGIES. And finally, provide CORRECTIVE FREQUENCIES, to restore balance in the system. We strongly believe in "BODY HEALS ITSELF".**

**We very well know, at initial stages there are no symptoms. It can be diagnosed only when revealed on the physical. But by then it is too late.**

**We, at MEHAK WELLNESS CENTRE, under the expertise of DR. RAJEEV MEHRA, a GOLD MEDALIST & REIKI GRAND MASTER offer NON-INVASIVE Diagnosis on State of the Art, latest 21st Century technology to verify the onset or presence of BLOOD CANCER & factors leading to Blood disorder and Blood Cancer causing factors.**

**We, run a complete 7000 parameter test which includes AUTO IMMUNE disorders and CHROMOSOMES and issues related to BLOOD & GENETIC disturbances, thus are in a position to guide the client of a future onset or presence of BLOOD CANCER and its spread in the system.**

**With vast experience of over 35 years, working with Cancer patients and being awarded with 80+ Certificates & Awards – DR. RAJEEV MEHRA is confident of handling all types of cases.**

**The test thus helps us in taking preventive measures for the disease much before it can show up on the regular physical tests.**

What we do / how we tackle this issue.

**We conduct a test to reveal the Genetic component involved in this disease. On having the results for the Blood, Genes, Chromosomes, Auto Immune & Cancer specific areas, we are in a position to assess the damage done or possible damage in the near future.**

**Our work is NON-INVASIVE. We work with BIOFEEDBACK and RADIONICS.**

**Cancerous cells may be of any type or in any part of the system, makes no difference, the therapy remains the same. All disorders related to disturbances in BLOOD are looked into.**

**Being in NON-INVASIVE stream, we do not recommend Chemo-Therapy, Radiation, or Surgery. As far as possible we advise to avoid removal of any Body Part.**

**Basic cause of CANCER is mainly due to GENETIC factors, thus by working on the root cause and stabilizing the GENES, CHROMOSOMES, AUTO-IMMUNE disorders and all parameters related with CANCER, including BLOOD, we are in a position to eradicate the CANCER Cells without any side effects or danger to client's life. Information on the spread of cancer cells in the system is important to tackle it from each and every cell / organ which it has invaded.**

**Main causes of activating CANCER are lack of Oxygen supply, Hypoxia and Acidosis. These issues are taken into account for correction along with other related issues instigating / provoking / supporting CANCEROUS Cells.**

REVERSAL OF ALL CONDITIONS, DISEASES, DISORDERS POSSIBLE.

**We advise to COMPLEMENT our services, with the ongoing therapies / treatment for better and faster results.**

**We strongly recommend DETOX procedure. This should be started immediately. COLLOIDAL SILVER WATER, ANTIOXIDANT HYDROGEN RICH WATER, ATOMY VITAMIN C and use of ZAPPER. RADIONICS and RIFE FREQUENCIES for basic corrections; start immediately on the RADIONICS maintenance kit. DIETARY SUPPLEMENTS (HemoHIM) for speedy recovery. NON-INVASIVE therapy is administered, which could take 18 to 72 sittings depending on the individual's resistance from within and the body's ability to HEAL.**

## MANAGEMENT FOR BLOOD CANCER

### BLOOD CANCER SOLUTION AVAILABLE

#### NON-INVASIVE THERAPIES FOR BLOOD CANCER

**Rs. 1,875/- (US\$ 25) Consultation**
