

UJWAL PHARMA PVT LTD

Plant I: N-52, MID C, TARAPUR, BOISAR, THANE – 401506, MAH
PLANT II: 300P, VILLAGE: MUSARANE, TALUKA: WADA, DIST: THANE, MAH

PRODUCT SPECIFICATION

POTASSIUM BENZOATE (C₆H₅COOK) is the salt of Benzoic Acid. Potassium Benzoate is a hygroscopic white, odorless offered for sale as Powder, Flakes and crystals. It has wide uses. Potassium benzoate is a high quality fine chemical specifically manufactured for food and beverage use. It is designed to replace Sodium Benzoate in application where the preserving powder of Benzoic Acid is required, but where low sodium content is desired

GENERAL PHYSICAL PROPERTIES:

POTASSIUM BENZOATE

Chemical Abstract No	:	532-25-2
Molecular Formula	:	C ₆ H ₅ COOK
Molecular Weight	:	160.22
Appearance	:	White Granular or Flaky Powder
Loss On Drying	:	1.5 % Min
Assay (On Dry Material)	:	99.0% Min
Identification	:	Passes Test
P H.	:	7 > 8
Chlorinated Organic Compound :		Not more than (0.06 %)
Heavy Metals	:	Not more than 10 mg

Version 2006, Uppl PB.
