

Detail : Our company products are as per the norms of WHO and USA FDA. No heavy metal narcotics or steroid is mixed in preparation in our any medicine.

Usages :

- It works in gout, Arthritis and acute problems of osteo Arthritis. It works to remove toxins and higher uric acid level from body to maintain level of uric acid.
- As it stops toxins and uric acid so it safe a person of crucial disease as cancer renal failure, kidney stone etc.

Note : We suggest to both male & female of above 50 age to take this 2 in the morning 2 in the evening to safe from crucial disease in future.

Gout :

- Gout is a medical condition usually characterized, by recurrent attacks of acute, inflammatory arthritis, a red, tender, hot, swollen joint.
- The metatarsal–phalangeal joint at the base of the big toe is the most commonly affected. However, it may also present as topi, kidney stones, or ureter nephropathy. It is caused by elevated levels of uric acid in the blood. The uric acid crystallizes, and the crystals deposit in joints, tendons, and surrounding tissues. Clinical diagnosis may be confirmed by seeing the characteristic crystals in joint fluid. Once the acute attack subsides, levels of uric acid are usually lowered via lifestyle changes, and in those with frequent attacks.
- Gout has become more common in recent decades. Gout was historically known as “the disease of kings” or “rich man’s disease“.

Signs and Symptoms : Gout can present in a number of ways, although the most usual is a recurrent attack of acute inflammatory arthritis (a red, tender, hot, swollen joint). The metatarsal-phalangeal joint at the base of the big toe is affected most often, accounting for half of cases. Other joints, such as the heels, knees, wrists and fingers, may also be affected. Joint pain usually begins over 2–4 hours and during the night. The reason for onset at night is due to the lower body temperature then. Other symptoms may rarely occur along with the joint pain, including fatigue and a high fever. Long-standing elevated uric acid levels may result in other symptoms, including hard, painless deposit of uric acid crystals known as topi. elevated levels of uric acid may also leads to crystals precipitating in the kidneys, resulting in stone formation and subsequent ureter nephropathy.

Causes : High levels of uric acid in the blood is the cause of gout. this can occur for a number of reasons, including diet, genetic predisposition, or under excretion of urate, the salts of uric acid. renal under excretion of uric acid is the primary cause of high level of uric acid in about 90% of cases, while overproduction is the cause in less than 10%. about 10% of people with high uric acid level develop gout at some point in their lifetimes.

Lifestyle : Dietary causes account for about 12% of gout and include a strong association with the consumption of alcohol, fructose -sweetened drinks ,meat and seafood. Recent studies have found that other dietary factors once believed associated are, in fact, not including the intake of purine-rich vegetables (e.g. beans, peas, lentils and spinach) and total protein. The consumption of coffee, vitamin-c and dairy products, as well as physical fitness, appear to decrease the risk.

Genetics : The occurrence of gout is partly genetic, contributing to about 60% of variability in uric acid

level.

Medical conditions : Gout frequently occurs in combination with other medical problems.

Pathophysiology :

- Gout is a disorder of purine metabolism, and occurs when its final metabolite, uric acid, crystallizes in the form of monosodium urate, precipitating in joints, on tendons, and in the surrounding tissues. these crystals then trigger a local immune-mediated inflammatory reaction.
- The triggers for precipitation of uric acid are not well understood. while it may crystallize at normal levels, it is more likely to do so as levels increase. other factors believed important in triggering an acute episode of arthritis include cool temperatures, rapid changes in uric acid levels, acidosis, articular hydration, and extracellular matrix proteins, such as proteoglycans, collagens, and sulfate. the increased precipitation at low temperatures partly explains why the joints in the feet are most commonly affected. Rapid changes in uric acid may occur due to a number of factors, including trauma, surgery, chemotherapy etc.

Oxylium Indicum - Dr. Thanki's Oxy-ium Capsule :

- It works in Gout, Arthritis and acute problem of osteo arthritis.
- Dosage - 1gm. To 10 kg. of patient body weight means 10 Capsule If, patient weight is 50 kg., as the capsule consist of 500 mg Capsule should be take with fresh and lukewarm water.
- Avoid - having much protein value, sour & citrus and stale food. Should take Light food. Note This helps in irritable syndrome patients also.

From The Desk Of Chairman : As the panchang of this plant is very difficult to collect. In the market the powder of this product is not available original or up to the mark. Our company researcher has found sure shot result on gout, rheumatism, joint pain and severe osteo arthritis .Some doctors from our company and some private doctors have trialed along with our Dr Thanki's DVT Protector Add On Vitalizer +Dr Thanki's Rati Priya Oil +Dr Thanki's Arthritis Capsule as suggested dosages and application on around seventy patients and got very good results than we decided to launch so that the patients of above mention disease may be benefited of this miracle herb. We are collecting this herb from the original source to maintain the quality of this product. We assuring the human being to serve this product in future of best quality to get best result. As we know that after taking food and liquid by a human it comes out from body in the form of urine and stool and along with them toxic materials remove out from body but if they did not remove out wholly they become remove out by ailment like loose motion, headache with cold, vomiting etc .Even if they don't remove out from body by ailment than they will deposite in the human body and converts into uric acid and the uric acid is fundamental cause of Arthritis and Gout.

DR. THANKI's OXY-IUM CAPSULE

Ingredients: Shyonak panchang

It works in Gout, Arthritis and acute problems of osteo arthritis.

Note : This medicine helps in irritable bowel syndrome and hence it works in constipation.

Special: As it works in removing uric acid from the blood through urine and stool it stops a lot of self generated disease like cancer, kidney stone, renal failure which are very crucial and non curable or typical to care.

Advise : The people of above 40 years should take this medicine every day to protect from self generated crucial disease.

Dosage:

For Normal patient : 2 capsules twice a day with water.

For chronic patient : 2 capsules thrice a day with water.

Should take: Light & easily digestive food.

Avoid: High protein food products, sour, citrus and stale products.

DR. थानकी ऑक्सी-यम कैप्सूल

Ingredients: श्योनाक पंचांग

ये दवा गठिया, संधिवात तथा लम्बे समय तक ऐसी बीमारियाँ रहने पर होने वाले ऑप्टियो संधिवात में अत्यन्त लाभकारी है।

नोट : ये दवा कब्ज को भी दूर करती है अतः बार बार शौच जाने वाली बीमारी को भी दूर करती है।

विशेष : चूँकि ये दवा शरीर में विद्यमान अधिक यूरिक एसिड (विजातीय द्रव्य) को खून से अवशोषित कर पैशाब तथा मल द्वार के रस्ते शरीर से बाहर निकालती है। जिससे मनुष्यों में होने वाले स्वजनित रोग जैसे कैंसर, गुर्दे में पथरी तथा गुर्दे के रोग जैसी जटिल रोगों को रोकने में सक्षम है।

सलाह : 40 वर्ष के महिला तथा पुरुष को ये दवा नियमित सेवन करनी चाहिए ताकि भविष्य में होने वाले स्वजनित जटिल रोगों से बचा जा सके।

मात्रा :
साधारण रोगी : 2 कैप्सूल साफ एवं स्वच्छ पानी के साथ दिन में 2 बार।
असाध्य रोगी : 2 कैप्सूल साफ एवं स्वच्छ पानी के साथ दिन में 3 बार।

पथ्य : हल्का तथा सुपाच्य भोजन।

अपथ्य : ज्यादा प्रोटीन युक्त भोजन, खट्टा तथा बासी भोजन।
