## From The Desk of Chairman:

Every day in the morning when we read newspaper we are bound to read advertisement of oil for stability in sex really this is just a psychology of human being to spend more and more time in intercourse whereas really it is not fact what the person want or just imagine.

–

As the world is short and there are lot of sites which exploits sexual material by seeing them the new generation are thinking that actually they spending the much time in intercourse which is quite impossible without taking steroids or they are just edited by film maker and it misguide to new generation.

In our research we found very few cases of early discharge and after diagnosed we found it is due to long sickness or mental depression or any kind of injury or loss of material products in life.

The erectile dysfunction is really observe in some patients due to lack of nutrition or diabetes or any kind of brain related disease. It is problem we can say to mankind and it is serious.

The oil which is available in the market is consist of some anesthetic compound with any oil which just give impression of senseless that organ for some time and the person thinks that the oil has given result of getting time in discharge but we know that the regular use of anesthesia may cause to permanent blockage or damage nerves and veins so it is not prescribed by any medical practitioners.
