

Usages : It works as anti coagulant agent, Cardio protective, Cardiac asthmatic conditions, Deep vein thrombosis, Varicose vein, Parkinson, Promotes fertility in both sex, Gives energy to old aged person, Works to stop Alcohol in taking, Promotes hemoglobin level when taken with milk and honey, Paralysis or any kind of disability after accident, Anti aging, As it works to blood thin so it helps in gas, acidity, migraine, digestion, loss of appetite.

Immobilization : Taxi drivers, Call center Professionals, Software engineers, Office workers, Bank employee, Pregnant women, or women who have had a baby in the last 6 months, immobility due to old age, or on the bed due to any surgical procedures may risk in common If they spend long hours in a seated position i.e. in the chairs- in cars, in train ,in bus, in –plane, on the bed –(not in moving position) is called as physiological (Bodily) Immobilization. Thus they may share an increased risk of deep vein thrombosis.

DVT (Deep Vein Thrombosis) : (DVT) is a condition whereby a clot forms in a large vein of the leg after prolonged sitting. This condition, commonly associated with long haul air travelers, software engineers, drivers, Vajrasan sitting of Asians, old age immobility, can cause discomfort or pain, or worse, a fatal heart attack or stroke.

Causes :

- Virchow’s triad is a group of 3 factors known to affect clot formation:
- Rate of flow.
- The consistency (thickness) of the blood.
- Qualities of the vessel wall

Dosages : 1 tea spoon full twice in a day with fresh water after meal or as directed by physician. After trials doctors suggested that to get better result of Dr. Thanki’s DVT Protector Add-on Vitalizer should be given to the patient as below mention. In one glass lemon water or one glass of gluconeC Water add one tea spoonful Isabgol (Psyllium Husk) and properly mix by stirring than immediately drink it. After 10 minutes take Dr. Thanki’s DVT Protector Add on Vitalizer 1 teaspoonful with fresh water. (like this patient should take thrice a day.)

For Accident or Paralytic Patients :

Follow as per table given below -

- 1st to 3rd day - $\frac{3}{4}$ spoon-2 hr. interval with Luke warm water
- 4th to 6th day - $\frac{3}{4}$ spoon-3 hr. interval with water
- 7th to 9th day - $\frac{3}{4}$ spoon-4 hr. interval with water
- 10th to 12th day - $\frac{3}{4}$ spoon-5 hr. interval with water
- 13 to 15th day - $\frac{3}{4}$ spoon-6 hr. interval with water
- 15th days onwards - same continue as 15th day.

Note : After 15 days continue same dose till it is cured give it with water.

Deep Vein Thrombosis (femoral clot) In The Upper Leg (thigh)

Immobile person: A person sitting more than four hours in a particular position is called as immobile person.

As per research by us and some modern science doctors immobility causes death.

Dr. Thanki's DVT Protector Add On Vitalizer (Total Health Care)

Introduction: The full name of DVT is Deep Vein Thrombosis, and it means that the blood becomes thick and coagulated and make blood clots inside the deep veins. Scientists declared this disease as silent killer and once this disease occur then it is very difficult to identified & cure, so it is better to prevent and protect from this disease. At present this word become very popular among the modern scientists and Doctors. The doctors concluded that these types of problem occur due to inactivity of the body for the long time. So it is often seen in pregnant women, inactivity of a patient after any kind of operation, the patient of any type of bone diseases, the inactivity due to old age, in old people and computer operating people or the people working in offices because they seat in one position for more than 4 hrs. as these persons are called as Immobile persons.

In ayurveda this type of disease is known as Vat-Rakta, and according to ancient records this type of disease was found in the people like Kings, potters, cooks, horse riders etc. The ancient holy books on Ayurveda inform us that this disease was curable by some Ayurvedic medicines.

The allopathic medicines which are formulated up to today are capable of making the blood thin for easy circulation but they are incapable to dissolve the blood clots. As a result what the medicine is provided by modern science can carry the blood clot from one place to other place in the body. In our product we are adding vitalizer with the medicine. The reason of which we are explaining as follows :-

1. The people of old age group can't walk much so they pass their time at home by sitting or sleeping. In the body of this type of people the small blood clots are developed and after sometimes these clots come together to form blockage inside any veins or arteries as the result of this the person dies.
2. This vitalizer which is added in our product is highly effective for old age people. It promotes them for walking and doing their own work.

Note: It is observed during the experiments done on old people that the persons who could do shaving only in sitting position, after taking treatment with this medicine became capable of doing shaving by standing position. The persons who were walking little at home, after taking this medicine could walk outside with increased confidence. We gave the name 'DVT Protector' because our product is capable of prevention of DVT formation and is also capable of dissolving the blood clots deposited in any part of the body.

As we know that the patient of DVT will also do a sitting job for survival in future and DVT will form so to protect from new formation of DVT in future we suggest to take it regular to protect hence we given name as DVT protector.

Young boys who generally put on tight pants & tight undergarments and do their work in offices sitting before computer or doing any other work in one sitting position continuously for more than four hours, the sperm count inside their body greatly decreases. Because testis become hot & it results to kill spermatozoa. This vitalizer helps to maintain the sperm count and it helps to remove the exertion & tiredness of the body due to excess mental work and also recharges the body. In the human body, up to the age of 24, the veins & arteries becomes fully developed, in which the blood circulates. As the age increases up to 40 years the blood becomes thick and as a result of it the density of blood increases, so the blood can't circulate properly and some vacuum is produced in the veins. During the course of time, air enters inside these empty places in the veins which are called 'Vat-Rakta' means the air in the blood (god does not permit vacuum at any place).

So one thing is that the blood of old person is thick & blood of young person is thin. This is the difference between the two. So we can conclude that if the blood of any person doesn't become thick that person will never suffer the problem of old age. If our medicine is used regularly by any person at the age of 30, his blood will not thicken due to age and he will be safe against the old age problems. As this medicine is fully capable to dissolve the blood clots, so by its regular use any type of blockage inside the heart is gradually removed. In any type of illness which is caused due

to the clot formation into blood in any part of body, this medicine is highly effective. We have given the name 'Cardiac Protective' to this medicine. As the blood becomes thin, which this medicine is very useful.

As the blood becomes thin, the digestion system works property and if digestion is good then the problem like constipation, insomnia, never occurs. In the case of migraine this medicine gives fast and good results. If we observed modern life style, we can see that the persons like bus travelers, train travelers, Magistrate, Bank Staff Member, Shares & Stock Workers, Goldsmith, Carpenters, Potters, Blacksmiths, the Pregnant Lady, Working on Computer, sitting in the office, the person after operation & persons working after bone diseases treatment for all such persons this medicine sates exactly. Shop keepers are also included in this list. So this medicine is applicable to 60% people in this time.

The extra advantage of this medicine is to control the fat. To decrease the fat of thick persons this medicine is highly effective. The patient suffering from gout, arthritis & joint pains, along with the regular treatment by any other medicine, if this medicine is taken, it gives excellent results. If any type of medicines is not effective on any diseases this medicine gives excellent results, means where no medicine works, this medicine will work. So we can say that this is a "master medicine" of our company. Even though a doctor has tried on a regular drinker of alcohol after 10 days the patient has left to drink and did not occurred any side effect. Though he was a regular drinker. For persons working in sitting position for long time gets swelling of muscles in legs, shows blood veins network, pain, uneasiness, fear, physical & mental tiredness for all such symptoms and to decrease the fat this medicine is highly effective.

It is effective on genital organs of both male & female. For male it increases sperm count, vigor & vitality. For male & female it gives new sex life. It removes all the blood clots produced anywhere in the body after accident and sickness like paralysis. It give relief from pain produced due to injury & swelling of muscles. It is tonic for heart. It tones the heart & removes all the clots from in the arteries & veins of heart. It is boon for all the heart patients. This medicine decrease the excess fat produced in the

body and control the thickness of body. It also controls the exhaustion due to thickness. This medicine gives excellent results for patients of Thyroid diseases. This medicine shows fantastic and fast result on Neuropathy and Retinopathy (occurred in diabetic patient). This medicine also increases haemoglobin. It controls blood pressure and cholesterol also.

Dosages 1 tea spoon full twice in a day with fresh water after meal or as directed by physician. After trials doctors suggested that to get better result of Dr. Thanki's DVT Protector Add-on Vitalizer should be given to the patient as below mention. In one glass lemon water or one glass of gluconeC Water adds one tea spoonful Isabgol (Psyllium Husk) and properly mix by stirring than immediately drink it. After 10 minutes take Dr. Thanki's DVT Protector Add on Vitalizer 1 teaspoonful with fresh water. (like this patient should take thrice a day.)

Note: The same application can be applied on persons who want to reduce the weight. Sometimes we found some patients who don't get breathlessness in winter season or dusty atmosphere but get breathlessness while climbing stair or walking for a long. These persons are the patient of cardiac asthma & for that after a long research by some doctors they have suggested to give Dr. Thanki's Asthma Powder along with Dr. Thanki's D.V.T. Protector Add on Vitalizer & it gives a fantastic result on such patients. Dr. Thanki's Asthma Powder Dosages : For such patients take this medicine once after breakfast, once at bed time means twice a day ($\frac{3}{4}$ teaspoon) mix with honey and form a paste of it. Than licking through tongue. Dosages for

Throid patients : one capsule twice a day .Dr. Thanki's Liver care powder $\frac{3}{4}$ tsp twice a day with like warm water and Dr. Thanki's DVT Protector Add on vitalizer one tsp three times a day. (to get fast result take one tsp isabgol husk (psyllium husk) with fresh water befor in taking of Dr. Thanki's DVT Protector Add on vitalizer.

For Accident or Paralytic Patients:

1st to 3rd day : $\frac{3}{4}$ spoon-2 hr. interval with Luke warm water

4th to 6th day : $\frac{3}{4}$ spoon-3 hr. interval with water

7th to 9th day : $\frac{3}{4}$ spoon-4 hr. interval with water

10th to 12th day : $\frac{3}{4}$ spoon-5 hr. interval with water

13 to 15th day : $\frac{3}{4}$ spoon-6 hr. interval with water

15th days onwards : same continue as 15th day.

Note : After 15 days continue same dose till it is cured give it with water.

Along with that after a long research some doctors has suggested to apply our company's Dr. Thanki's Rati Priya Oil to get best result on affected area.

How Dvt Developes ? And It's Complications

A thrombosis is the formation of a blood clot in a blood vessel. Deep vein thrombosis(DVT) is a form of thrombosis that develops in one of the deep veins of the body.DVT often begins in the calf or thigh because blood moves relatively slowly in these areas, particularly if exercise is limited. As the blood begins to pool in an area, a clot develops and can attach itself to the wall of a vessel or in more severe cases become wedged within a vessel, blocking blood flow.

Blood clots are common. And while a blood clot itself is not life threatening it can cause serious complications. Professor Reginald Lord, head of the vascular group of St. Vincent's hospital in Sydney, says only one percent of venous thromboses cause complications.

As a clot develops in size, it can shed pieces of the clot. These are referred to as emboli. The emboli float through the blood system and can travel through the heart to major arteries in the lung causing serious and sometimes fatal complications.One of the most serious is referred to as a pulmonary embolism where blood flow to the lung is blocked. In rare cases, the clot could also be pumped towards the brain and block arteries that supply the blood in brain. If this happens, a potentially fatal stroke may result partial or improper use of any part of the body.

Pulmonary Embolism (When Thrombus Reaches To The Lungs)

-

Diagnosis

Symptoms (How We Come To Know) ?

Generally symptoms include:

Chest pain

- Swelling of the leg or lower limb
- Shortness of breath
- Surface veins becoming more visible
- Pain or tenderness in the leg. The pain is usually in one leg and may be felt only when standing or walking.
- Increased warmth in the area of the leg that is swollen or in pain.
- Red or discolored skin.

Long sitting V/S Mental & Physical complications Must Know?

Banks

Banks are only the media for business transactions & bank employees perform this work efficiently when they are having their long sittings in the chair because it is the matter directly related to the cash their long sitting.

Call Centers

Call center works is of it's great importance because this is the fastest and

only the medium connecting and informing the men to men at national and international level. This works is only possible with constant long sitting

Key Ingredient

- Withania Somnifera
- Terminalia Arjuna
- Emblica Officinale
- Tinospora Cordifolia
- Tribulus Terrestris
- Bauhinia Variicata–
- Terminalia Chebula–
- Piper Longum–
- Curcuma Longa–
- Stevia Rebaudiana Bertoni–
- Asphaltum
- Tachyspermum Ammi

The main goals of treatment with DR.THANKI'S DVT PROTECTOR
"ADD ON VITALIZER for deep vein thrombosis are:

- To prevent the blood clot from becoming larger.
- To prevent the blood clot from traveling to the lungs (pulmonary embolism).
- To prevent post thrombotic syndrome, a condition that can cause pain, swelling, and sores of the affected leg.
- To prevent the recurrence of blood clots.
- To raise the sperm count in the male & making them fertile.
- To relieve the symptoms of mental and physical fatigue.

From The Desk Of Chairman

I was always thinking in my mind that why a person look old in old age

why he become have some wrinkles on face and different parts of body secondly a person does not suffering with any kind of disease but he also died at old age why he die or what happen with that guy when he died normally people are saying his time was over and god called him.

I was confusing always by listening these words and question was always in my mind as it was known to me that if I will ask this question to any one he will laugh and will say the truth is to born and die on earth. But I cant stop myself and delivered it to my guru and my research team they did not laugh but shocked to listen topic I said to them. After all the research started and we found that the young person become old as after 40 years the metabolism become reduced and the blood become some thick which create vacuum in blood veins where air goes and caused the imbalance of hormones and the changes seem in the body as white hair and wrinkles'So main cause find as thickening of blood means if we maintain our blood thin after 40 years we did not get hormonal imbalance hence the white hair ,wrinkles or any other symptoms will not occur.

Dr. Thanki's DVT Protector Add On Vitalizer can maintain our blood thin.The immobility causes death and at the old age people lose their confidence and mostly they stay at him watching some time TV or taking rest or just walking when performing his morning duty. Question arise who is immobile: a person sitting more than four hours in particular position is called as immobile person.

When a person become immobile there if formation of blood clot on deep vein and they may become co angulate and form a big clot which may block heart, brain or nervous system and it may lead to death.Dr.Thanki's DVT Protector Add On Vitalizer can destroy the blood clots and could save life.It may destroy blood clots and can dissolve in blood again.

-If don't want to look old and if you are more than 35 years you may start to save yourselves from looking old secondly if don't want die by DVT and you are more than 60 years please start today for safeguard.

Dr. Thanki's DVT Protector Add on Vitalizer

Ingredients : Aswagandha, Arjun-Chhal, Avala, Gink Gokhru, Kachanar Chhal, Harde, Chhoti Pipal, Haldi, V Tulsi, Sudha Silajit, Ajawayan.

Introduction : The full name of DVT is Deep Ve Thrombosis, and it means that the blood becomes thick & coagulated inside the deep veins.

In the year 1964 the French Scientists used this wo (DVT) for the first time when a person after long distan traveling by airplane was found suffering from this type symptoms and died after five days. Scientists decaded this disease as silent killer and once it disease occur then it is very difficult to cure so it is better prevent this disease.

Afterwards this word became very popular among th modern scientists and Doctors. The doctors concluded th these types of problem occur due to inactivity of the body i the long time. So it is often seen in pregnant women, inactiv of a patient after any kind of operation, the patient of any ty of bone diseases, the inactivity due to old age, in old peop and computer operating people or the people working offices because they seat in one position for more then 4 hrs. In ayurveda this type of disease is known as Vat-Rakta, ac according to ancient records this type of disease was found the people like Kings, potters, cooks, horse riders etc. The ancient shastras inform us that this disease was curat with the help of Ayurveda.

The allopathic medicines which are formulated up today are capable of making the blood thin for easy circulatio but they are incapable to dissolve the blood clots.

In our product we are adding vitalizer with th medicine. The reason of which we are explaining as follows: The people of old age group can't walk much so they pas their time at home by sitting or sleeping. In the body of th type of people the small blood clots are developed and aft sometimes these clots come together to form blockage insid any veins or arteries as the result of this the person dies. This vitalizer which is added in our product is highly effectiv for old age people. It promotes them for walking and doir their own work.

Note : It is observed during the experiments done on o people that the persons who could do shaving only in sittir position, after taking treatment with this medicine becam capable of doing shaving by standing position. The persor who were walking little at home, after taking this medicir could walk outside with increased confidence. We gave the name 'DVT Protector' because our product capable of prevention of DVT formation and is also capabl

dissolving the blood clots deposited in any part of the body. Young boys who generally put on tight pants & tight undergarments and do their work in offices sitting before computer or doing any other work in one sitting position continuously for more than four hours, the sperm count inside their body greatly decreases. This vitalizer helps to maintain the sperm count and it helps to remove the exertion & tiredness of the body due to excess mental work and also recharges the body.

In the human body, upto the age of 24, the veins & arteries becomes fully developed, in which the blood circulates. As the age increases upto 40 years the blood becomes thick and as a result of it the density of blood increases, so the blood can't circulate properly and some vacuum is produced in the veins. During the course of time, air enters inside these empty places in the veins which are called 'Vat-Rakta' means the air in the blood.

So one thing is that the blood of old person is thick & blood of young person is thin. This is the difference between the two. So we can conclude that if the blood of any person doesn't become thick that person will never suffer the problem of old age.

If our medicine is used regularly by any person at the age of 30, his blood will not thicken due to age and he will be safe against the old age problems.

As this medicine is fully capable to dissolve the blood clots, so by its regular use any type of blockage inside the heart is gradually removed. In any type of illness which is caused due to the clot formation into blood in any part of body, this medicine is highly effective.

We have given the name 'Cardiac Protective' to this medicine. As the blood becomes thin, which this medicine is very useful. As the blood becomes thin, the digestive system works properly and if digestion is good then the problem like constipation, insomnia, never occurs.

In the case of migraine which is due to the modern life style, this medicine gives good results. The persons who works in sitting position for more then 4 hrs. are called immobile persons. This type of people is prone to the disease called DVT.

If we observed modern life style, we can see that the persons like bus travelers, train travelers, Magistrate, Bank Staff Member, Shares & Stock Workers, Goldsmith, Carpenters, Potters, Blacksmiths, the Pregnant Lady, Working on Computer, sitting in the office, the person after operation & persons working after bone diseases treatment for all such persons this medicine sates exactly. Shop keepers are also included in this list. So this medicine is applicable to 60% people in this time. The extra advantage of this medicine is to control the fat. To

decrease the fat of thick persons this medicine is highly effectiv The patient suffering from gout & joint pains, along with the regu treatment by any other medicine, if this medicine is taken, it giv excellent results.

If any type of medicines is not effective on any diseases th medicine gives excellent results, means where no medic works, this medicine will work.

For persons working in sitting position for long time gets swelling muscles in legs, shows blood veins network, pain, uneasine fear, physical & mental tiredness for all such symptoms and decrease the fat this medicine is highly effective. It is effective genital organs of both male & female. For male it increases sper count, vigor & vitality. For male & female it gives new sex life removes all the blood clots produced anywhere in the body a accident and sickness like paralysis. It give relief from p produced due to gout & swelling of muscles. It remo constipation due to sitting for long time. It is also useful for migra It is tonic for heart. It tones the heart & removes all the clots fro the arteries & veins of heart. It is boon for all the heart patients.

This medicine decrease the excess fat produced in the body control the thickness of body. It also controls the exhaustion du thickness. This medicine gives excellent results for patient: Thyroid diseases, Neuropathy (occurred in diabetic patient). medicine also increases the proportion of blood. It controls bl pressure and cholesterol also.

Dose : Morning - One Tea-Spoonful after breakfast with wa Evening - One Tea-Spoonful after dinner with water.

Note : The persons who does not get breathlessness in w season or dusty atmosphere but get breathlessness while clim stairs or walking for a long are suffering with **Cardiac Asthma**, that use our Dr. Thanki's Asthma Power alongwith this medicin mentioned below:

Dose of D.V.T. Powder in Cardiac Asthma
Take 1 glass lemon water and add one spoon of Isabgol power. Take it & after 10 minutes take this medicine (3/4 spoon) with w Thrice a day.

Note : The same application can be applied on persons want to reduce the weight.

Dr. Thanki's Asthma Powder Dose
For such patients take this medicine twice a day (3/4 spoon) honey.

For Accident or Paralysis Patients : Follow as per table g below-

1st to 3rd day : 3/4 spoon-2 hr. interval	10th to 12th day : 3/4 spoon-5 hr. interval
4th to 6th day : 3/4 spoon-3 hr. interval	13 to 15th day-3/4 spoon-6 hr. interval
7th to 9th day : 3/4 spoon-4 hr. interval	15th days onwards : same continue as 15

Note : After 15 days continue same dose till it is cured give it Luke warm water.

Note : For any kind of assistance please contact on Mot 09352950999

डॉ. थानकी डीवीटी प्रोटेक्टर एड ऑन वाईटलाइजर (सम्पूर्ण स्वास्थ्यदायक)

घटक : अश्वगंधा, अर्जुनछाल, आंवला, गिलोय, गोखर, कचनारछाल, हरद, छोटी पीपल, हल्दी, वनतुलसी, शुद्धशिलाजीत, अजवायन।
निर्देश : डीवीटी का पूरा नाम है डीप वेन थ्रोम्बोसिस अर्थात् गहन शिराओं में खून का थक्का बनना।

सबसे पहले इस शब्द को फ्रांस के वैज्ञानिकों ने 1964 में काम में लिया जब एक व्यक्ति लम्बी दूरी की हवाई यात्रा के बाद ऐसे लक्षणों से ग्रस्त पाया गया और पाँच दिनों बाद उस व्यक्ति की मृत्यु हो गई।

वैज्ञानिकों ने डीवीटी को साइलेंट किलर की संज्ञा दी है इस रोग के एक बार होने के बाद इसका इलाज मुश्किल है इसलिए इससे बचाव जरूरी है।

कालान्तर में ये शब्द आधुनिक विज्ञान के डॉक्टरों के बीच काफी प्रचलित हुआ फिर डॉ. लोगो ने निकॉल निकाला कि गर्भवती महिला ऑपरेशन के बाद हुए अपचलायमान, हड्डी रोगी, वृद्धावस्था के बाद हुए अपचलायमान, वृद्ध लोग, कम्प्यूटर या अन्य किसी ऑफिस में चार घंटे से ज्यादा एक मुद्रा में बैठने वाली लक्षां को होती है। आयुर्वेद में इस रोग को वातरक्त के नाम से जाना जाता है तथा शास्त्रों के अनुसार पुरातन काल में ये रोग राजा, हलवाई, कुम्हार, सुद्वारवा आदि व्यक्तियों को विशेष रूप से होता है।

पुरातन काल में शास्त्रों के हिसाब से इस बीमारी का इलाज आयुर्वेद में संभव था।

आधुनिक विज्ञान में जो एलोपैथि बर्दाश्ती अभी तक बनी है वो खून को पतला करने में सक्षम है परन्तु खून के थक्कों को तोड़ पाने में सक्षम नहीं है।

हमारी इस दवा में वाईटलाइजर साथ मिलाया हुआ है, जिसकी वजह नीचे लिख रहे हैं जो लोग वृद्धावस्था की वजह से ज्यादा चल फिर नहीं पाते हैं ऐसे व्यक्ति प्रायः घर पर बैठकर या सो कर अपना समय व्यतीत करते हैं।

ऐसे व्यक्ति के शरीर में ये खून के थक्के धीरे-धीरे निर्मित होते हैं फिर एक दिन ये थक्के आघस में मिलकर कहीं भी नाहियों में या शिराओं में अवरोध पैदा करते हैं परिणाम स्वरूप उस व्यक्ति की मृत्यु हो जाती है।

ये वाईटलाइजर ऐसे वृद्धजनों को चलने फिरने तथा अपना काम करने के लिए प्रेरित करते हैं।

नोट : वृद्धजनों पर परीक्षण के दौरान देखा गया है जो वृद्ध बैठकर बाड़ी बनते थे वो इस दवा के सेवन के पश्चात् खड़े होकर बाड़ी बनाने लगे। जो वृद्ध घर में धोधा बहुत घूमते थे वो आत्मविश्वास के बढ़ने से घर से बाहर भी घूमने लगे।

हमने डीवीटी प्रोटेक्टर नाम दिया है कारण हमारी दवा डीवीटी को बनने से रोकने में भी सक्षम है साथ ही शरीर के किसी हिस्से में जमा हुए खून के थक्के को तोड़ने में भी सक्षम है।

जवान लड़के जो टाइट पैंट या टाइट अन्तःवस्त्र पहनते हैं तथा ऑफिस में कम्प्यूटर या अन्य कार्य घर घंटे से ज्यादा एक मुद्रा में बैठकर करते हैं ऐसे व्यक्तियों के शरीर में शुक्राणुओं की निम्नती काफी कम हो जाती है ये वाईटलाइजर ऐसे व्यक्तियों के शरीर में शुक्राणुओं की निम्नती कम नहीं होने देता है तथा अधिक मानसिक कार्य करने के कारण शरीर में आई अक्षमता को दूर

कर नवसंचार का समायोजन करता है।

मनुष्य के शरीर में 24 वर्ष की आयु तक नाड़ी शिराएँ धमनियाँ पूर्ण विकसित हो जाती हैं। जिसमें मनुष्य के शरीर का खून संचार होता है। जैसे-जैसे मनुष्य की आयु 40 वर्ष की होती है उसके पश्चात् खून शिथिल होने लगता है अर्थात् खून गाढ़ होने लगता है परिणामस्वरूप खून का घनत्व बढ़ जाता है और खून शिराओं में धीरे-धीरे शुद्ध विकसित होने लगता है जहाँ कालान्तर में दवा प्रवेश कर अपना स्थान ले लेती है और इसी को वात रक्त कहते हैं।

यदि यह तो तब हो गया कि वृद्ध मनुष्य और जवान मनुष्य में एक ऊँच होता है कि जवान मनुष्य का खून पतला तथा वृद्ध मनुष्य का खून गाढ़ होता है। यदि किसी मनुष्य का खून गाढ़ न हो तो वो वृद्ध होगा ही नहीं।

हमारी दवा का सेवन यदि कोई व्यक्ति 30 साल की उम्र से ही लगातार करना शुरू कर दे तो उसका खून गाढ़ होगा ही नहीं अर्थात् वो वृद्धावस्था के दुपरिणामों से बच सकता है।

चूँकि ये दवा शरीर में स्थित खून के थक्के को तोड़ने में पूर्णतया सक्षम है अतः इस दवा के सेवन से हृदय में कोई अवरोध है तो वो भी धीरे-धीरे हट जाता है। ऐसी कोई बीमारी जो हमारे शरीर के किसी भी अंग में खून वा इसके थक्के के अवरोध कारण उत्पन्न हुई हो ऐसी बीमारी में यह दवा पूर्णतया कारगर है।

हमने इस दवा को कॉर्डिक प्रोटेक्टर की संज्ञा भी दी है। खून के पतला करने से रक्तचाप, कोलेस्ट्रॉल को नियंत्रण में रखने में ये दवा सक्षम है। खून के पतला रहने से शरीर का पाचनतंत्र भी सुचारु कार्य करता है तथा व्यक्ति को पाचन क्रिया सुचारु रहने पर कब्जा, अनिद्रा जैसी बीमारियों से भी निजात मिल जाती है।

आज की जीवन शैली में आधारीत माइग्रेन नामक बीमारी आम व्यक्तियों को हो जाती है इस बीमारी में ही ये दवा पूर्णरूप कारगर साबित हो रही है।

जो लोग दिन भर में चार घंटे से ज्यादा एक ही मुद्रा में बैठकर कार्य करते हैं ऐसे व्यक्तियों को अपचलायमान व्यक्ति कहते हैं ऐसे व्यक्तियों को ही डीवीटी नामक बीमारी का खतरा रहता है।

जब आज के युग में नजर बीहूतते हैं तो बस यात्री, रेलयात्री, मजिस्ट्रेट, बैंक कर्मचारी, शेयर मार्केट में काम करने वाले, जोनार, कुम्हार, सुधार, लौहार, कम्प्यूटर के आगे काम करने वाली गर्भवती महिला, ऑपरेशन के बाद रोगी, हड्डी रोग के इलाज के दौरान आदि सभी प्रकार के व्यक्ति इस अपचलायमान की व्याख्या में सटीक बैठते हैं। बुकानवार भी इससे आछुते नहीं हैं। अतः ये दवा आज के युग के 90 प्रतिशत लोगों में उपयुक्त बैठती है।

इस दवा का विशेष फायदा चर्बी शायम में देखने को मिला है। मोटे व्यक्तियों के आगे चर्बी घटाने के लिए ये दवा कारगर है। महिला व जोड़ों के बर्ब की किसी भी दवा के साथ इस दवा के सेवन से रोगी को जल्दी आराम व अभूतपूर्व लाभ मिलाता है।

इसने लाभ देखाते हुए जिस रोगी को कोई दवा कारगर न हो वहाँ ये दवा कारगर होती है।

उपयोग : लम्बी बैठक के कार्यों से पैरों में सूजन, रक्त शिराओं का जाल बिजाई देना। दर्द, बैथेनी, धवरारट, मानसिक व शारीरिक थकवट, वसा
