

VEGETABLE GRADING LINE WITH SCREEN SIZER

Consists of

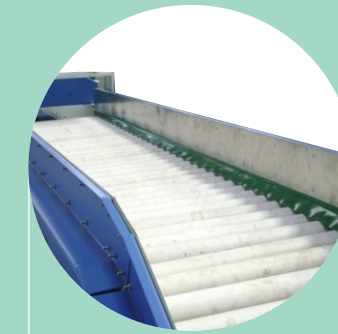

- Elevator with Hopper
- Dry Brusher
- Roller Inspection Table
- Screen Sizer

Capacities : 5 TPH, 10 TPH, 15 TPH

Used for Manual Inspection & Grading of Potato, Onion, Garlic

VEGETABLE GRADING LINE WITH SCREEN SIZER

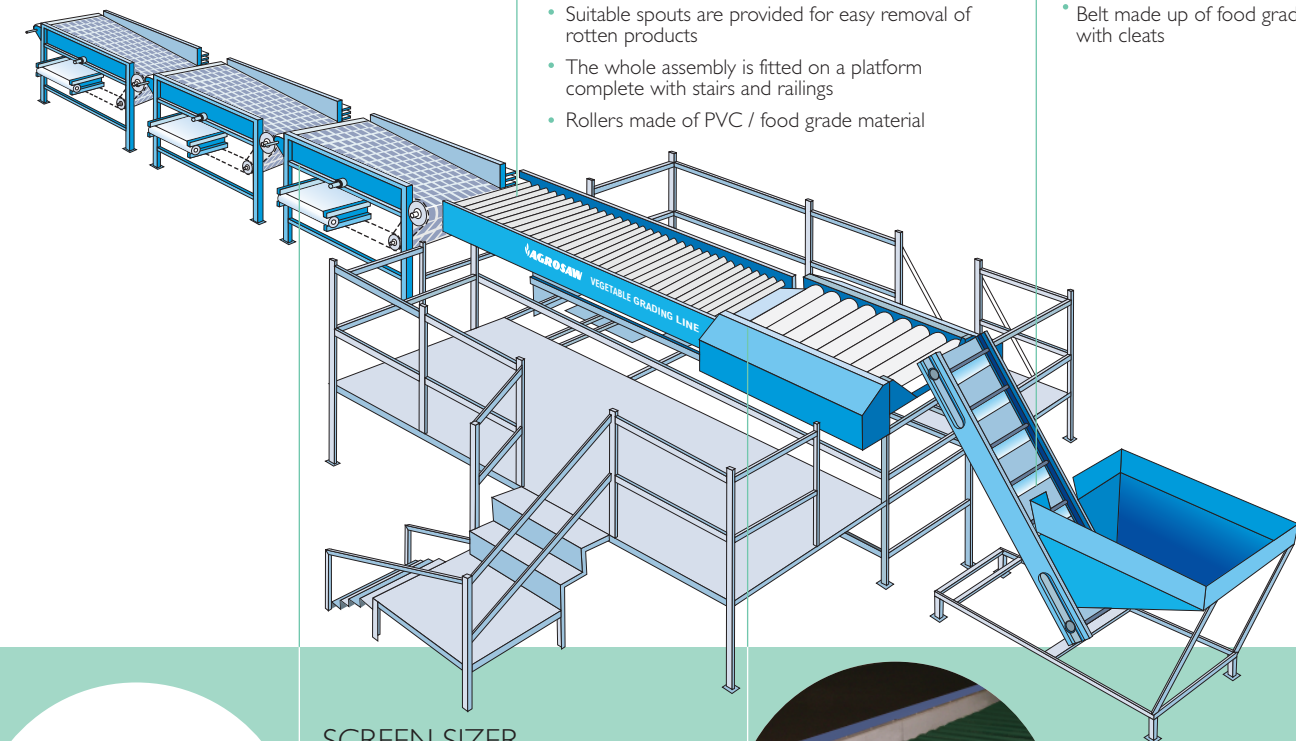

ROLLER INSPECTION TABLE

- Rollers rotate on their own axis & at the same time move forward
- Workers standing on both sides of the machine sort out damaged & rotten products
- Suitable spouts are provided for easy removal of rotten products
- The whole assembly is fitted on a platform complete with stairs and railings
- Rollers made of PVC / food grade material

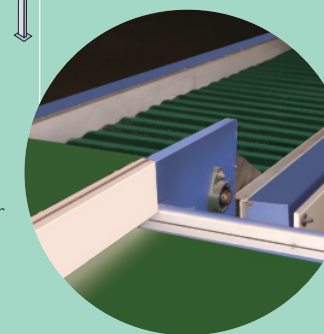

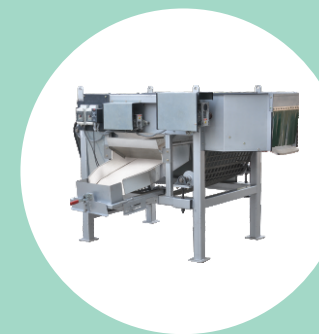

ELEVATOR WITH HOPPER

- Product is dumped manually onto the hopper
- The belt elevates product to the required height
- Belt made up of food grade / PVC material with cleats

SCREEN SIZER

- Suitable for grading of potato, onion & garlic
- Machine is fitted with vibrating rubber screens
- Shape and size of perforations on the rubber screen differ according to the product
- Product either drops through the perforation or goes across the screen
- Machine is fabricated in modular type; each module grades the product into two grades i.e. oversize and undersize
- More number of grades can be obtained by using more than one module in a line

DRY BRUSHER

- Dry Brusher is fitted with soft nylon bristle rollers
- Removes the soil or dust particles from the surface of the product
- A hopper is fitted under the bed of bristle rollers to collect the loose soil or dirt
