JADE STONE

With its shiny green luster the precious jade stone has been known to mankind for 7000 years. Finally recognized for its exquisiteness, in 3000 BC the JADE STONE was considered the royal gem in Eastern part of the World, where it's worth is comparable to gold and diamonds as in the west. In traditional Eastern medicine, the Jade is believed to possess healing qualities by emitting energy that strengthens the lungs, heart, thymus, immune and nervous system, as well as increasing kidney filtration and blood detoxification.

The Jade is a natural transmitter of far-infrared rays in the same wavelength as from the human body. It contains vital elements essential for human body such as calcium and magnesium. The Jade encourage the cells metabolism, which increases vitality, enhance endurance and strengthens immune defense. It is well known for slowing down the process of aging as well as maximizing the body's ability to strengthen its natural defenses and healing abilities. Benefits eye disorders, kidney stones and female discomfort.

The health benefits of jade are also now becoming known in the west. In a study performed in Germany, it was reported that the jade lowers high blood pressure and improves poor circulation.

Jade stone well known worldwide for its healing power, peace, serenity, memory, increases vitality & fertility, encourages harmony, inspires wisdom & wealth, prolongs life. Can treat disorders of the heart and spleen. Facilitates meditation.

In a nutshell, JADE STONE is considered to be a "Dream Stone".

Electromagnetic Spectrum

Far Infra Red Rays

Far infrared rays are photons of light energy radiating within a specific measurement of wavelengths from 4 to 1,000 microns. Although, far infrared is invisible to the human eye, it can be felt.

Upon being absorbed by the soft tissues of your body, FIR (9-14 microns) appears to be most resonant with cell tissues and harmonizes with your own life-force energy. This natural process, known as "resonance absorption", produces warmth and stimulates your metabolism, possibly making far infrared light, just as important as vitamins and minerals to the body's proper functioning.

Far Infrared Benefits The Whole Body

Regular exposure to far infrared rays is similar to physical exercise in its effects on the body. FIR improves the balance of blood pressure, blood sugar, and an increase in oxygen and nutrients in your cells, resulting in increased muscle strength, vitality and mental stability.

Natural wavelengths of far infrared light are essential for bone growth, as well as, preventing osteoporosis, regulating hormonal functions, and boosting our immune system.

Far Infrared Ray (FIR) makes cleansing toxins more efficient by breaking bigger and lifeless water molecule into smaller molecule cluster and is easier absorbed by our body cells & very effective in cleansing impurities and toxins from our body.

Small water clusters can easily penetrate cells for improved hydration.

Smaller molecular clusters will penetrate into our cells easier. Small clusters are perfectly designed to interact with other molecules, to communicate using energetic vibrations, and to slip easily through cellular membranes to carry out toxins and chemical waste from our body. Hence, keep them young and vibrantly healthy. Most important is there will be no more trapped toxins scarring the cells and giving us cellulite.

Negative Ions

Negative ions are formed when water or silver nano particle is atomized. Try to feel when standing near a waterfall or deep in the mountains and lush green forests. The refreshing, invigorating feeling you get in these wonderful natural settings are negative ions at work!

Research shown that negative ions can:

Remove and destroy airborne bacteria and viruses.

Affect levels of serotonin, a neuro hormone associated with anxiety, stress and migraine.

Have a beneficial effect on anyone suffering from bronchial complaints such as bronchitis, asthma, catarrh and the common cold.

Help sufferers of insomnia, migraine, emphysema, eczema, headaches, tiredness, and general feelings of malaise.

Increase the speed and quality of healing of burns and surgical incisions with less cross infection and reduced pain.

Enhance the body's absorption and utilization of oxygen, thus assisting concentration and alertness.

Reduce the effects of passive smoking, and allergies to pollen, dust and pets.

Neutralizes positive ions that emanate from your computer monitor.
