Specification:

1. The cooling tunnel include

whole frame--Power Systems --- conveyor chain plate --- sprinkler system --- control system--
automatic feeding bottle.

2. Main Features:

Continuous cooling tunnel introduction of foreign advanced technology , absorbing Italy, Taiwan and other similar products made on the basis of a new design. Mainly used for a variety of bottled , canned drinks , roof package and Tetra Pak beverage after cooling after hot filling. Cold bottles media, Automatic temperature control. The machine adopts circulating water spray cooling etc multistage process, Have water, energy etc advantage.

use imported PP chain plate, plate is smooth, resistant to abrasion, prevent scratches to bottom of the container, Belt accord to food hygiene requirements, and received U.S. FDA approval.

Pipe sprinkler, structure simple, Easy to install, easy to clean, spray nozzle using a dedicated atomizer, Uniform atomization sprinkling on the container to prevent damage to the packaging container.

Cold water recycle and reuse systems, Spray for 30 minutes, Temperature control in the $\pm 1^{\circ}\text{C}$.

The machine automatically feeding bottle and output bottle, to achieve a fully automated production line, whole body is made of SUS304 stainless steel, Beautiful and health, with Visual Window, Manufacture sophisticated, stable, easy to use.

Technical data:

Width: 2000mm

Length: 20000mm

Material: Stainless steel

Main configuration:

Item	Name	Brand	Origin
1	Machine body material	SUS304	
2	Chain material	Special chain plate, high temperature resistant PP material	
3	PLC	Siemens	Germany
4	Touch Screen	Siemens	Germany
5	temperature controller	OMRON	Japan
6	Magnetic valves	UNI-D	Taiwan
7	switching power supply	OMRON	Japan
8	button switch	Schneider	France
9	Motor	Jinlong	Taiwan
10	Relay	WEIDMULLER	Germany
11	cocontactor	Schneider	France
12	frequency converter	Danfoss	Denmark
13	amphenol connector	WEIDMULLER	Germany
14	Conveyor line chain material	dupont POM material	USA
