

Pushp

Ltd.

**Gladly announces a
new range of Solar
Powered commercial
signages, traffic signs
and Street Lights**

1st Time In India ^{LTD.}

- Pushp india is the first company in India to have launched a new series of signages based on solar power. This has been developed keeping in view the demand of the corporate for Green energy source signage which are also free from human intervention .
- This signage has been greatly appreciated for the rural market and Multi dwelling units.
- Apart from commercial signages we have also developed traffic signs, street lights and many

SOLAR SIGNS

- What are solar signs: The signages which are so very important for marketing of a products can either be lit from conventional electricity or alternate renewable resources. Here we have developed the

PRODUCT-2

● *SINGLE SIDED SLIDE CHANGEABLE BOARD*

- (1), Product Specifications: 305 mm x 609 mm x 102mm
- (2) Material: All aluminum material, durable, can be used for more than 15 years, frame spray, beautiful and durable, the color up to dozens of built-in import light guide plate, the performance of the light guide.
- (3), light source: 5050 high lumens LED energy-saving light, energy savings of more than 50%.

SOLAR POWERED TRAFFIC SIGNS

- We have also developed a variety of traffic signs and emergency signs all working on solar energy. These are best used at construction sites etc where electric supply is not available and traffic needs to be regulated at night.

SOLAR POWERED STREET LIGHTS

- We realise that in a energy deficient country like India, street lights consume so much of electricity and if the same can be solar powered, we can substantially reduce valuable energy consumption for more important usage. Hence these LED bases street lights are a
