

## **DIGESTOL**

**Powerful ANTI-ULCERATIVE - DIGESTIVE**

### **Stimulates the gastro-intestinal tract (GI Tract)**

#### **Action:**

Anti-Ulcerative Agent

Mild Antacid action relieves Burning Sensation & Ulcer Pains

Provides soothing layer on the ULCERATED Portion

Heals the ulcerated wound. Overcomes damage & Ulceration by its unique tissue regeneration process.

Aids Digestion

By enhancing the secretions of Digestive Juices.

Peptin etc.

#### **Cure Constipation:**

Regulates peristalsis.

#### **Salient Features:**

Many patients suffering from digestive disorders usually complain of constipation. Digestol in such cases clears the gastro-intestinal tract and acts as an attendant feature in rectifying its functioning.

#### **Points to Highlight:**

The Only Digestive tonic, which works in 3 ways!

As an Antacid.

As an Appetizer.

As an Enzyme.

#### **Indications:**

Loss of Appetite.

Dyspepsia

Flatulence

Indigestion

Eructation

Constipation

Gastric Distention

Heart burn

## **Important Features:**

- 1- Restores natural appetite: During ATT or Antibiotic Therapy, lost due to the disturbance of the intestinal flora.
- 2- Relieves Burning Sensation & Ulcer Pains: Provides a soothing layer on the irritated stomach mucosa. Corrects the acid-mucous balance.
- 3- Overcomes Damage & Ulceration by its unique tissue regeneration process.
- 4- Coordinates Peristalsis & Distension: Thus preventing reoccurrence of Ulcer.
- 5- Anti-Inflammatory Action
- 6- No Side Effects

**Contraindications: None**
